UNBILL Generates a report of all unbilled procedures prior to printing insurance forms

so that necessary claims may be requested through the Claims program.

AGING Aging of account balances.

SPOOLR Print the Unbilled work report and delete aging.

END OF DAY - Close out your day with these programs

LOGINO Balance production totals and payments prior to printing DAYSHT

DAYSHT Balance production and payments. Production may also be verified through

PRDRPT Payments are also listed on the summary screen of LOGINQ POSTNG Run, after verifying both charges and payments, for that date.

Request Electronic Claims.

BACKUP
Should be performed daily

PCFREQ Generate Patient Care Forms for next days appointments.

WEEKLY - Suggested list of programs to run each week

Lost and Found Report. To find patients that do not have an appointment or Recall in the system.

LETTER Dentech Letter Book. Generate letters for patients and referring doctors.

IFORMS Request batched ADA forms and manual claims.

MONTH END – DENTECH highly recommends programs run each month

MTHEND Is an "internal" program that stores monthly totals for future analysis. There is

no associated report after generation. This program must be run prior to

requesting analysis reports. (See Note)

RSTMAX To reset annual maximums for insurance benefits. This should be run at the

end of the last working day of the month or in the morning of the first working day of the month.

TRAINING TIP

MONTHLY PROCEDURES - Suggested monthly programs and reports

LTCHRG Generates Late Charges to outstanding accounts.

STMENT Generate patient statements.

LSTMNU U-Account Audit Report to see if any accounts are out of balance.

RECALL Generate a report or database for selected month for patients recall.

To generate a report or database for selected monthly appointments.

MONTHLY REPORTS - Suggested monthly reports

REVRPT Revenue Report, if applicable.

PRDRPT Summary only. Shows Gross & Net production by provider.

PRODAR Producer Account Receivable Report. Shows A/R total per provider.

Separates Insurance A/R & Account A/R per provider, by patient.

INCWRK Generates a list of all patients with outstanding treatment plans within a given time frame.

IAGRPT Insurance Aging Report for Claims and Predetermination's.

AGERPT Aging Report by patient balance.

CAPRPT Generate Capitation Reports (if applicable)

PAYAR To receive a summary of balances. Aged to 180 days.

MOSSUM A summary of all charges, payments & adjustments, including net change.

PRDRPT Adjustment Report shows all adjustments for a given time frame.

PRDRPT Collection Report creates a report of all payments.

DAYSHT Bank Deposit Report shows a summary of each day's bank deposit for a given period.

ANALYSIS REPORTS - (Month-end must be created first)

ANALYS Reports should be run for monthly Production, Collection, and Revenue totals.

These totals may be compared to a previous month or quarter if desired.

PLANAL Analysis reports for specific Insurance companies. Employer, or Form codes.

MKTANL Analysis reports of marketing areas, referral acknowledgment report.

** NOTE**

The suggested "monthly" reports may be run more frequently, if desired, and DO NOT necessarily have to be run at the end of the month.

PERIODIC MAINTENANCE

SYSTEM: Create System Recovery Media. Generate every time an update is installed or an enhancement or

correction has been made. This is a NECESSARY part of rebuilding your system in the unlikely event

of a hardware failure.
